

## SIEVA FLEET TRAC: The Most Comprehensive Real Time Vehicle "Black Box"

**SievaFleetTrac** provides advanced realtime monitoring of vehicles and fleets. Suitable for law enforcement, emergency service providers such as ambulances and corporate vehicle fleets. Commercial trucks carrying cargo are vulnerable to thefts in many parts of the world – **SievaFleetTrac** enables realtime monitoring that serves to mitigate cargo losses during transit.

- Precise location coordinates using GPS and vehicle speed information logged every 10 seconds. A map of entire travelled trajectory is provided
- Works with GSM Cellular network providing the widest possible global coverage
- Records in vehicle audio and video (slow motion image stills)
- Optional vehicle remote disable feature

**SievaFleetTrac** by providing complete audio and video data, entire commercial vehicle fleets can be monitored to prevent erratic driving due to intoxication on the job and ensure complete compliance with local speeding regulations and rules. It serves well for monitoring school buses, long distance passenger transport services such as Greyhound and high value transport trucks such as oil tankers.
